FOSSILIA PLATINUM BOWL

\$440

DESCRIPTION

Drawing inspiration from madreporite fossils, this oval-shaped bowl is a captivating sculptural object. Long, sinuous ridges characterize the shell-white unglazed porcelain exterior, their tactile quality achieved with the "biscuit" technique. The visually stunning interior is handmade using 22kt platinum, the metallic finish contrasting with the stark white exterior. The interplay between contrasting colors and sinuous forms makes for a striking composition that will add a touch of contemporary elegance to any decor.
