Glas Italia

FRAGMENT MODULAR SCREEN BY NENDO

\$4,810

DESCRIPTION

Functional and decorative, this modular folding screen is composed of two hinged panels framed in polished aluminum that play with transparency, reflection and depth, projecting a fragmented image (hence the name) on both sides. The 3D-effect checkered pattern is obtained by layering two extra-light clear glass panels, positioned just a few centimeters apart, decorated with silver rectangles arranged vertically on one and horizontally on the other. This superb design by Japanese designer Nendo is entirely modular and more panels can be added to fit any interior decor need.
