FUTURISTA VASE #1

\$460

DESCRIPTION

Marked by a dazzling array of colors in bold brushstrokes that depict a fragmented space, this spectacular vase is part of the Futurismo 3.0 Collection that combines creativity, history, and contemporary taste. The oblong shape is worked on a lathe and painted with a brush with clean lines and vibrant colors in a geometric design reminiscent of Giacomo Balla's paintings. The entirely handcrafted process gives this ceramic vase a one-of-a-kind character. A well-received gift for a special person or an addition to a personal collection, this vase will not go unnoticed.
