## GALA CONTAINER STOOL BY LUCA MACI

\$1,250

### DESCRIPTION

Designed by Luca Maci exclusively for Zag Design, the unique shape of this container stool is inspired by Salvador Dalí's 1952 painting "Galatea with Spheres". The birch plywood structure features a central element with a flat top and rounded base around which the spherical feet and lateral elements create a spiral "galaxy" enhanced by the horizontal striped pattern of the wood. This functional designer piece with a distinct sculptural character will find a spot in any room.
