GASOMETRO RING ROSE GOLD

\$170

DESCRIPTION

The design of this elegant ring is a tribute to Rome's gas holder, a structure used to store natural gas for the city's needs that is now a landmark architectural building. Made of pink gold-plated bronze, the open structure is composed of four parallel lines intersected by vertical lines that form squares on which "X" elements are overlaid in a striking graphical look. This magnificent ring will add vintage allure to any outfit.
