GATSBY WALL CLADDING BY FEDERICA BIASI

\$5,795

### DESCRIPTION

Inspired by the gates of the 1930s historic Milanese buildings, this brass covering has a multi-dimensional and architectural quality. The arches and lines of the design in bright gold over a black background have a tactile finish and visual depth which is obtained through a micro-engraving technique. Creating a strong visual impact in an entryway, loft interior, living or dining room, this stunning wall cladding is unique and timeless, suitable for both classically- and modern-furnished interiors. Presented during 2018 Milan Design Week at Fuorisalone. Designed by Federica Biasi.
