GEOMETRIC-STYLE 4-DOOR SIDEBOARD WITH FRETWORK

\$4,680

DESCRIPTION

A striking interplay of triangular shapes enlivens the design of this wooden sideboard, standing out for the bright fretwork detailing adorning the doors. An exquisite example of modern cabinetmaking artistry, it features a bold and linear structure resting on a matching plinth base and providing ample storage space, which is revealed by pulling the four front doors. The all-over brown stain enhances the wood's natural grain and the contrast with the metallic fretwork.
