## GIULIANO TABLE

\$8,120

### DESCRIPTION

This striking dining table combines a contemporary and minimalist design with the use of noble materials to create a timeless object of functional decor. The structure, in durmast oak painted in a rich shade of brown, supports a rectangular top in Bleu Turquin marble, which gained popularity during the Medieval times and Renaissance in Florence for the construction of buildings, churches and fountains. The piece is highlighted at the base with fixed Bleu Turquin disks that add the illusion of movement.
