## GOLD LEAF DIAMOND VASE

\$690

### DESCRIPTION

Part of a series of vases in extruded polyurethane with a stucco finish and a striking gold leaf decoration, this piece will make a statement in a contemporary decor, thanks to its asymmetric diamond shape accented with a series of parallel grooves running horizontally on its surface and creating ascending and descending steps. The bronzed effect is created by a bituminous patina that is covered with a clear top coat of epoxy resin. A stunning objet d'art, this vase will be an eye-catching addition to a modern home.
