Lorenzo Franceschinis

GRAPHITE CEDAR #7

\$660

DESCRIPTION

Turned from a singular piece of cedar, this striking vase shows the work of nature in the delicate rings that run throughout its surface. The curves of its silhouette are enhanced by the choice of a dark color for the exterior, obtained with the use of oxides and graphite. The irregular opening that makes its mouth adds to the feeling that this is a magnificent object showing the power and allure of nature, accompanied with the expert touch of wood working.
