GREEN BUGNATO BOTTLE BY IL VETRO DI EMPOLI

\$160

DESCRIPTION

This exquisite artistic bottle is part of a collection that celebrates the century-old glassmaking tradition of Empoli by revisiting ancient and everyday objects with contemporary sensibility. The slender neck and flared mouth are the result of a careful handcrafted work carried out by expert artisans that shape the incandescent glass by blowing into metal rods and decorate it using special tools. The distinctive "green Empoli" color displays all its chromatic nuances through the depressions on the surface made by hand using the bugnato technique that give each piece unique characteristics.
