GREEN CRYSTAL ICE-CREAM BOWL

\$180

DESCRIPTION

Seemingly crossing the bridge between past and present, this delightful ice-cream bowl is an interplay of pure volumes created according to 19th-century glassblowing techniques. Its captivating silhouette consists of a spherical base in green crystal, slightly flattened at the bottom, that supports a V-shaped recipient marked by a ridged texture. The daring personality of this piece makes it ideal simply as a sculptural, decorative item.
