GREEN GLASS SCREEN

\$19,200

DESCRIPTION

Stunning in its simplicity, this screen is a sophisticated reinterpretation of vintage screens. The wooden frame in black Chinese lacquer supports the distinctive mouth-blown glass panels created by layering clear and green glass. The verdant frond motifs are crafted with handmade etchings in the traditional Acquaforthe techniques, captivating for the color and textural contrasts. A deft showcase of innovative vision, this piece will be a versatile addition to a living room or study decor.
