## GREEN PLUMAGE VASE

\$320

### DESCRIPTION

This striking ceramic vase designed by Cristina Celestino for BottegaNove is a unique piece that was hand-decorated by expert artisans. The feathers that run in parallel rows across the surface of its cylinder are finished with a superimposition of different especially-designed enamels in green, grey, and white to give the illusion of natural feathers. The plinth base and interior of the piece feature the same vivid green shade.
