Manuel Coltri

HACKER 1 VASE #2

\$12,635

DESCRIPTION

A kaleidoscopic design graces the surface of this vase of rare sophistication by Manuel Coltri executed by carefully cutting and composing sections of white Carrara and white Sivec marbles with blue sodalite. The checkerboard pattern is repeated on the entire vase, alternating sections of delicately veined white marbles with sections of white marble and cobalt blue sodalite, for a harmonious aesthetic result that stands out in all Hacker Collection, designed by DWA Studio and curated by Paolo De Vivo.
