Lorenzo Franceschinis

HAMMURABI #12 SET OF TWO VASES

\$885

DESCRIPTION

These two vases were hand-turned from a piece of walnut wood. Their cylindrical shape has an irregular silhouette that follows the natural curves of the wood, which was treated with pigments of different hues. These colors enhance the textured surface of these pieces that shows small carvings running horizontally throughout the exterior of both, adding a modern touch to this timeless set. Ideal in any setting, it will particularly complement a contemporary décor.
