## HANN VASE

\$470

### DESCRIPTION

A poetic homage to childhood, this original vase exudes imaginative flair and geometric whimsicality into any minimalist decor. This mixed-media vase is entirely crafted using a 3D printer and FDM technology, the PLA filaments effortlessly combining to form a fantastical critter that is stunning in all its quirky details. The geometric blue-seafoam green-white sculptural base is embellished with red antennae, golden arms, and delicate red, blue, and orange ergal round knobs. Can be used as a statement piece or paired with others from the same designer for a complete look.
