HAT CARBON ROUND CENTERPIECE

\$1,050

DESCRIPTION

Part of the Hat collection, this centerpiece was crafted of a special material developed by Frisoli, Frisolo Cloto, where carbon fiber is mixed with drippings of aerospace material to create unique decorative patterns on the grey of its surface. Mesmerizing and sophisticated, this object will be a stunning complement to a contemporary home, where it can be used to store and display collectibles on a console or fruit arrangements on a dining table. It can be combined with the others in the same series for a dynamic effect.
