## HAT CARBON SQUARE CENTERPIECE

\$1,210

### DESCRIPTION

Either alone, to add a superb touch to a contemporary dining table, or combined with others, to create a dynamic display on a console in an entryway, this elegant centerpiece is part of the Hat collection, inspired by the kinetic sculptures by Alexander Calder. Its square silhouette features a surface that slants toward the center to contain everyday objects or collectibles. Its unique coloration and one-of-a-kind decorative patterns are features of the Frisoli Cloto, a material developed by Frisoli, obtained by pouring aerospace material over carbon fiber.
