HEIMAT COFFEE TABLE

\$5,490

DESCRIPTION

This striking coffee table will make an arresting statement in any decor, particularly if it is a modern one. Its polyhedric silhouette is inspired by the stilt house buildings. The legs are in solid durmast oak wood and support a top made of three spaces and one drawer, plus two layered areas and a central tower. This unique structure also has three secret chambers. The combination of different types of wood adds a variety of shades to the piece to complete the look.
