HEKA SCONCE

\$650

DESCRIPTION

This elegant sconce is entirely made in metal and consists of a short base with a chrome finish that supports an upward facing shade finished with a black varnish and adorned by a series of dots. This structure allows the light to illuminate the ceilings, but also the bottom, thanks to an aperture at the base. The small decorative dots punctuating the shade let small sparkles of light escape from the sides as well, creating unique effects.
