HIBISCUS #8 SET OF THREE BOWLS

\$550

DESCRIPTION

This magnificent set consists of three bowls of different sizes entirely made by turning hibiscus wood. The irregular mouth that opens at the top of each piece in different shapes reveals the surface of the wood inside, while the exterior is treated with a black color that has a striking contrast with the light color of the interior. The timeless majesty of nature and the modern color combination make this set a contemporary and sophisticated addition to any living room, dining room, or entryway.
