HUMAN BEING DINNER PLATE N. 1

\$110

DESCRIPTION

A dazzling array of people is the focal point of the porcelain plates from the Human Being Collection, introduced at Maison&Objet 2019 in Paris. This elegant dinner plate showcases the culture of the Far East, with two figures in traditional clothes enclosed in a decorative white frame with Asian motifs. Set on a blue background, the rim is framed by a colorful garland composed of a series of people from around the globe donning their native accessories and garments. This superb object of functional decor can be served on a modern or eclectic table along with the other designs for a dynamic effect.
