IL MESSAGGIO SCULPTURE IN ELM

\$590

DESCRIPTION

Part of a collection of sculptures crafted on a lathe using different woods and made in the shape of bottles, this piece is crafted of elm. The delicate curves of this familiar object of our daily life are highlighted and enriched by the natural decorative pattern of the wood's grain that was given a brushed finish. A striking addition to a bookcase, an entryway, or a mantelpiece, this sculpture can be displayed alone or accompanied by others in the same series for a dynamic effect.
