DESCRIPTION

This piece is incredibly unique and will set your interior apart from any other ordinary décor. It is executed in ceramic with a pure white glaze and it is comprised from three main components. Its spherical body sits on a small round base, and is topped by a round component with a prickly surface. From this top piece, stem several arms in silicone holding threads of white wool, which intricately weave around the top of the piece. The contrasting textures of the materials add a nice touch to this decorative object.
