JOLLY ICE BUCKET

\$410

DESCRIPTION

Drawing inspiration from the medieval court jesters ("giullare" in Italian), this silver-plated metal ice bucket is a timeless accessory for a home bar to entertain in style. This exceptional piece is characterized by a bulb-shaped bucket and a delicate mouth that flares out to form triangular points with a small sphere at the top, reminiscent of a jester's hats with bells. This delicate touch adds an element of whimsy and delicate charm to a formal and traditional piece of silverware.
