## JUGLANS #9 SET OF THREE VASES

\$490

### DESCRIPTION

Entirely turned from European walnut wood, the three vases that make this set have slightly different sizes and conic shapes softened by round lines. The striking detail of each piece consists in the texture that features tiny parallel lines carved irregularly till the small openings of the mouths. To enhance the effect of the short grooves, the color applied on the surface appears in large spots of different hues from mustard to pale blue, giving this set a modern allure.
