JUNGLE CABINET

\$5,040

## DESCRIPTION

Inspired by the timeless allure of jungle vegetation as reproduced in Henri Rousseau's paintings, this cabinet is a superb addition to a modern or eclectic interior. It was entirely crafted by hand and is custom made. Its structure is covered in a sheet of solid "frisÃ©" maple. The standout element on this piece is the stunning inlaid decoration on the two front panels, handmade by expert artisans using exotic woods to reproduce the luxuriant leaves of the jungle. The interior is enriched by a veneer in rare green briar-root and a shelf in bronzed crystal. The legs are in natural brass.
