KAZIMIR SCREEN FLORAL SET

\$9,745

DESCRIPTION

This set of three floral-patterned screens designed by Julia Dozsa will exude geometric allure in any interior space. Inspired by abstract geometry, the rounded metal frames are covered with jersey and complete with a semi-oval corten steel base with a rust-like finish coated in wax. The focus on geometric forms is reflected in the panel's asymmetry, half in a block color (forest green, aubergine, and canary yellow) and the other in a vibrant floral print from Jan de Heem's "Flower Still-life with Crucifix". Panels connected by magnets covered in brass, allowing for limitless combinations. These pieces are prototypes handcrafted and signed by the designer and they are immediately available for order.
