KAZIMIR SCREEN TYPE B GEOMETRIC PATTERN

\$4,190

DESCRIPTION

Distinguished for their originality and whimsical designs, this screen by designer Julia Dozsa will be a striking statement piece in a modern or minimalist interior decor. The rounded, semi-oval silhouette with a wide base and rounded top is constructed of wood and covered with jersey for an ethereal and lightweight look. The panels, connected by two magnets covered by brass rings, are inspired by Kazimir Malevich's paintings, half in white and half in black with red geometric forms. A semi-oval corten steel base boasts a rust-like finish created by applying natural wax. This piece is a prototype handcrafted and signed by the designer and is immediately available for order.
