KURSA SCONCE IN BRASS

\$875

DESCRIPTION

This sconce features a central joint that allows the shade to be redirected, making it a versatile addition to any wall. The minimalist structure and geometric shapes coexist with the use of a traditional material, such as brass, in this case with a bronze finish that makes the structure and shaft strikingly complement the black varnish of the cylindrical shade. Traditional materials and contemporary sensibility live in this piece that is a precious addition to any room.
