LA NENA SCULPTURE

\$470

DESCRIPTION

Inspired by the longitudinal shape of African canoes traditionally carved out of tree trunks, this eye-catching sculpture is made of solid walnut wood and rests on a U-shaped brass base. The textural contrast between the natural wood, with its unique grains and warm color, and the pure, unchanging metal gives this sculpture an alluring visual balance, making it the perfect piece to display in a private studio or entryway, or on a large console.
