LACUNARE BASSA SIDEBOARD

\$6,150

DESCRIPTION

Designed by Carlo Chiappi for Meccani in 1995, and inspired by mid-century designs, this sideboard is crafted of three different types of wood that give a multi-dimensional look to its classic form. The rectangular frame and raised base are made of pear wood, while the four doors of maple wood have front panels decorated with carved squares. A striking ash wood top and three long shelves of maple wood complete this functional and versatile piece. Placed in a kitchen or in living room, this sideboard will give a warm accent to any room.
