LADY BIGLOVE CLUTCH

\$940

DESCRIPTION

This clutch will add a touch of luxury to any evening attire. Its structure was entirely crafted by hand by master craftsmen and the metal accents decorating the front of the piece were 3D printed, individually made and far removed from the mass production model. This clutch, featuring a large interior pocket in calfskin leather and a removable chain strap, is the epitome of Italian traditions combined with futuristic design. All metal elements were hand burnished and then plated in gold.
