Glas Italia

LAYERS BLUE BOOKSHELF BY NENDO

\$8,900

DESCRIPTION

This captivating bookcase by Nendo showcases a three-dimensional, chromatic, architectural look with a structure entirely made of extra-light glass (8+8 mm-thick). The three shelves are revealed when sliding the colored panels suspended on the back, each in a different gradient of blue, that overlap producing striking chromatic variations. Masterfully created by Glas Italia, the panels are handmade using a complex glass technique by heat-sealing a colored film between two sheets of glass. Available in warm tones (orange, red, brown) and cool tones (light blue, grey, violet).
