LEONARDO TRAY

\$910

DESCRIPTION

Part of a limited edition of 20 pieces decorated by hand using water-based, non-toxic paint, this square tray is handcrafted of red fir and defined by unconventional simplicity. Featuring a distinctive design of two gray concentric circles on a cream background, one side of the tray is decorated with a pattern inspired by Japanese origami - a square formed by a series of taupe, gray, white, black, and brick red triangles - that creates an eye-catching, optical illusion. Elegant and versatile, this tray can be showcased alone or used to display objects in the living room and bedroom.
