LEOPOLDO SIDE TABLE

\$3,360

DESCRIPTION

This striking side table is very versatile and can be used by a sofa in the living room, between armchairs in a large entryway, or even in a bedroom. The round base is in Portoro marble with a glossy finish that mirrors the larger wooden round top painted in glossy black. The unique feature of this piece is the vertical structure made of eight Portoro marble spheres. A modern design is combined with a marble traditionally used during the Renaissance and Baroque periods to make objects now displayed at the Museo degli Argenti of Palazzo Pitti in Florence.
