## LIBER MULTIFUNCTIONAL WALL UNIT

\$2,880

### DESCRIPTION

This statement piece combines the warmth of natural wood with minimalist lines and functional details to create an exceptional multi-purpose wall unit that can be displayed in an entryway or living room. The bahia structure is enriched with a multicolored door made of four precious woods (wenge, mahogany, maple, and beech) that create a geometric marquetry of stunning optical effect. The central shelf has three decorative inserts that can be used to store and display various items. The interplay of empty and full spaces is underlined by the tall legs that enhance the geometric silhouette.
