LIGABUE PENCIL IN COCOBOLO WOOD

\$180

DESCRIPTION

This striking pencil features a large body holding a 3mm lead that makes it easy to write and draw with. The accents in chromed metal complement the body, which is in cocobolo wood, a rare wood from Central America that features a dark orange color with red and brown veins that make it unique. Because of the handmade manufacturing process each piece is unique and can be different from the photo (it can also be hand-engraved).
