TABLETOP : GLASSES & DRINKWARE : DECANTERS

*Simone Crestani*

## LIMITED META DECANTER

\$1,380

### DESCRIPTION

This exquisite decanter was entirely mouth-blown and handmade of borosilicate glass and is part of a limited edition of only 29 pieces. Its sinuous shape, resting on a small plinth base, is inspired by the silhouette of a specific beetle, the *Stellognata Maculata*, which also appears as striking decoration that tops the lid of the piece. The exoskeleton of this insect, very much like a container, protects its inhabitant, so this unique but functional piece of decor will be a vessel for decanting and serving wine. This piece comes with an encyclopedic print depicting the beetle.
