MALACHITE SIDE TABLE

\$5,425

DESCRIPTION

This side table appears small and delicate at first until the striking, natural hand-cut malachite top is observed. This striking stone features a variety of striations in shades of green, spanning from light to dark and everywhere in between. The stone is connected to creativity, promoting the development of intuition. The use of this material, often used in jewelry, makes this object truly precious. The elegant base, handcrafted in a minimalist style, is in gold-plated brass and can be customized to fit the client's needs.
