## *Piatto Unico*

### MAMMIFERI ESCLUSI SET OF PLATES

\$260

#### DESCRIPTION

These exquisite plates can double as charger and bring a sophisticated accent to any table. They were entirely handmade in Nove, a district famous for its ceramic production since the 18th century. Their classic shape is adorned in the center with black and white drawings from 19th century scientific books: a swallow flying, two goliathus beetles facing each other, a deep sea fish, and a frying dragon (that appears on 16th and 17th century books, although now only existing in our imagination). A striking addition to a dinner, this set will make an elegant statement on any occasion.
