MANHATTAN SOFA

\$4,890

## DESCRIPTION

Ergonomic shapes and dynamic volumes make this sofa an elegant piece whose distinctive feature is the base, with its cantilever feet positioned in a unique way to function as base for the deep armrests. The polyurethane foam of the lining is mixed with polyester fibers with weaved elastic belts to cover the wooden structure. The density of the foam in the seats is 35kg/3m and is combined with feathers, as is the backrest, whose density is 21kg/3m. The grey fabric is a versatile choice for a modern interior. The small pillows are not included.
