MARIANNE MODULAR BOOKCASE BY FEDERICA BIASI

\$7,535

### DESCRIPTION

A reinterpretation of the classic "sky-to-ground" bookshelves of the 60s, this striking bookcase is designed with an upright iron frame and six shelves that convey an elegant sense of lightness, while offering a stylish organizational and display surface for books, collectibles and trinkets. Designed by Federica Biasi, featured at the Fuorisalone event of 2018 Milan Design Week, this modular structure can stand alone or be combined with other units to personalize any living room or office interior. Contemporary and refined at the same time, this piece can be customized in height and number of shelves.
