Zanetto

MEMORIA GLASS

\$160

DESCRIPTION

This striking glass is entirely made in a silver alloy and its bright surface is glossy and smooth on the inside, while the exterior shows small grooves that run horizontally along the half-cone of the body and vertically on the wide lip above it. The classic shape of a glass is reinvented with the choice of this bright and reflecting material that will add splashes of light to a dinner table or a living room during cocktail hour.
