## METASCULTURA 1 LIGHT-SCULPTURE

\$9,120

### DESCRIPTION

A tribute to Giorgio de Chirico, this iron sculpture is part of the Torri series (towers in English) and features a sturdy square base supporting an intriguing upright construction. The structure has four flat panels in the corners of the base arranged with an inward slant, while the flat top connects the pillars, adding visual harmony to the piece. Four LED spotlights along the base create a fascinating interplay of shadow and light that reflects off the flat top, infusing a unique atmosphere into any interior. The dark blue polished finish is a custom blend on an acrylic base.

### DETAILS & DIMENSIONS
