## MINO SILVER VASE

\$380

### DESCRIPTION

Inspired by the eternal gesture of a man offering flowers to his loved one, this vase boasts a minimalist structure that evokes the silhouette of a man in the act of slightly lowering his head while presenting his bouquet to his lover. The flowers can be inserted in the two compartments, which also function as base. Crafted entirely of ceramic, this piece boasts a striking silver finish that will be particularly suitable for a colorful contemporary entryway or minimalist living room or study, wither alone or displayed with others in the same series.
