NATURA MORTA 2-VASE SET #1

\$320

DESCRIPTION

This exquisite set is inspired by the bottles that Giorgio Morandi painted in his mesmerizing still life works. Crafted by hand of ceramic and boasting a delicate matte finish, contrasting with the lacquered interior, these two vases combine a short and round silhouette with a tall and angular shape and can be displayed as a contemporary, three-dimensional still life on a shelf, mantelpiece, or console. A superb piece of decor, this set can also be used to display floral arrangements in endless combinations. Le Morandine collection.
