NATURA MORTA HEXAGONAL SUPPORT IN BRASS

\$160

DESCRIPTION

Part of the Natura Morta collection inspired by the Japanese art of Ikebana, this sophisticated object is entirely made in brass. Its hexagonal shape features a hole at the top where the stem of a dried plant or leaf (not included) can be inserted, making it a modern take on the traditional art of arranging flowers. The result is an ever-changing composition that will create a balance between nature and contemporary shapes, enhancing its environment.
