NOTTE GIORNO #2 SCULPTURE/VASE BY NINO BASSO

\$1,440

## DESCRIPTION

The contrast between daylight and darkness inspired artist Nino Basso to craft this singular ceramic piece - an hybrid between a sculpture and a vase - following the ancient Japanese raku technique. The semi-spherical body is externally finished in anthracite gray without the use of oxides, while the flat, disk-like surface featuring a central hole flaunts a textured surface combining gray and white. Supplied with care instructions.
